### **DETAILED ACTION**

1. Acknowledgment is made of applicant's amendment which was received by the Office on April 7, 2005.

2. Claims 3, 4, 62, 79, 103, 173-189, and 230 are canceled. Claims 232-275 have been added. Claims 1, 2, 5-61, 63-78, 80-102, 104-172, 190-229, and 231-275 are active.

#### ***Claim Rejections - 35 USC § 102***

3. Upon further reconsideration of applicant's claim cancellations and claim amendments, the Examiner is withdrawing the 35 U.S.C 102(b) rejection of Brendel et al '627 (Applicant's Prior Art), which was made against claims 1-4, 18, 26, 53, 190, 197, 198, and 208 in the last Office action.

#### ***Claim Rejections - 35 USC § 103***

4. Upon further reconsideration of applicant's arguments and amendments to the claims, the Examiner is also withdrawing the 35 U.S.C 103(a) rejection of Brendel et al '627 in view of Brendel et al '103 (both Applicant's cited prior art), which was made against claims 27, 52, 60-62, 73, 74, 81, 101, 102, 112, 113, and 138 in the last Office action.

#### ***Allowable Subject Matter***

5. Claims 1, 2, 5-61, 63-78, 80-102, 104-172, 190-229, and 231-275 are allowed.

*Reasons for Allowance*

6. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 101, and 144 describe elements of a feedthrough terminal assembly for an active implantable medical device including, among other features, an inductor bonded to parts of a capacitor with non-conductive material or in a non-conductive manner. This teaches away from the prior art, which shows electrical connectivity at nodes between these elements (e.g. node 528 in Fig.8B of Foster et al '776-A1). Likewise, other independent claims disclose unique configurations of grounding the terminal's capacitors and inductors to a ferrule, not shown or taught in any of the prior art references (i.e. claims 40, 41, 190, 231). Yet other independent claims recite features of the device's inductors not present in the prior art, namely: construction using high permeability ferrite material (claim 5), the use of conformal coating (claim 7), the use of an insulator material between the inductor and terminal pin (claim 10), and the use of a "second" inductor (claim 13).

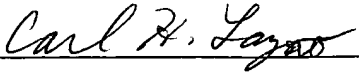

In view of the shortcomings of the prior art, the Examiner deems these claims and their depending claims to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
